EDUCATION

Georgia Institute of Technology
Bachelor of Science in Computer Science

Atlanta, GA
Aug 2022 – May 2026

EXPERIENCE

Software Engineer

May 2025 – Present

Itential

Atlanta, GA

- Architected and deployed a self-refreshing **Sales Pipeline Analytics Platform** powering downstream AI-driven deal analysis, on a 7-stage **AWS Lambda/Step Functions** pipeline with **automated CI/CD**, replacing a fully manual daily process and eliminating recurring analyst workload entirely
- Built a production **AI/data pipeline** (Snowflake, Salesforce, Gong) with an evaluation framework scoring 21 deal-qualification criteria across the full active pipeline, writing LLM-synthesized, corrected values back into 150+ Salesforce records, turning a manual review process into a self-serve, always-current data layer
- Identified gaps in customer-risk visibility** and designed and built, **from 0 to 1**, an LLM-enabled risk detection system that analyzes customer interactions to proactively identify churn indicators and simplifies stakeholder response via a centralized Risk Management Platform.

Software Development Intern

Jan 2025 – May 2025

Itential

Atlanta, GA

- Built and maintained a suite of **MCP (Model Context Protocol) servers** connecting LLM applications to Snowflake, Salesforce, and Jira, letting end users query governed data in natural language with zero API or SQL knowledge
- Developed an interactive, semantic search AI knowledge base chatbot leveraging **RAG (Retrieval Augmented Generation)** with a vector database (Qdrant) and LlamaIndex to enable natural language querying over various sources of internal knowledge, reducing retrieval time 80x
- Built and integrated LLM-driven data quality automation, scoring 400+ interaction records and auto-generating loss retrospectives for 160+ opportunities, removing manual data entry from the CRM and improving forecast/reporting trust

Software Development Intern

May 2024 – Aug 2024

Epi-Use

Atlanta, GA

- Built a real-time, full-stack data visualization feature for a bitemporal data store, using pub/sub messaging and agents to sync frontend and backend, plus a Python collector and Vue.js UI that let users pull and render live data on demand.

EXTRACURRICULAR INVOLVEMENT

Executive VP, Finance VP

Aug 2022 – May 2026

International Ambassadors at Georgia Tech

Atlanta, GA

- Led cross-functional planning for our organization's annual Night Market, coordinating logistics, vendors, catering, and performances for **1500+ attendees**.
- Secured **\$20K+** through organizational partnerships and grant proposals, allocating resources to programs serving Georgia Tech's international community.
- Presented funding proposals and event plans to university stakeholders, translating program goals and financial requirements into clear recommendations.

PROJECTS

Dungeon Crawler Game | *Java, Android Studio, Git*

Aug 2023 – Dec 2023

- Served as tech lead for a 5-person team building a 2D dungeon crawler in Java/Android Studio, running the team through an Agile sprint cycle from architecture through delivery
- Built a fully playable game loop featuring multi-layered dungeon navigation, a weapon/power-up system, and enemy combat mechanics

MediConnect CareHub | *Figma, User Research*

Aug 2023 – Dec 2023

- Directed the design of a secure in-home monitoring UI for elderly patients, giving caregivers streamlined access to critical medical data and documentation
- Conducted user research through interviews with elderly patients and caregivers, translating findings into iterative UI design decisions that addressed their specific accessibility and usability needs

SKILLS

Languages: Mandarin Chinese

Technical Skills/Platforms: Python, Java, JavaScript, SQL, HTML/CSS, Salesforce, Snowflake, Git, AWS

AI/LLM: MCP (Model Context Protocol), Claude Code, RAG, LlamaIndex, Qdrant, Embeddings & Vector Search, LLM Orchestration & Agents, LLM Evaluation, Prompt Engineering, Harness Engineering

Certifications: AWS Certified Cloud Practitioner, Responsible Conduct of Research Certification - CITI Program
